Troubleshooting: The Bulk Copy Parameters Were Invalid

Olalekan Adebayo
Updated 2 years ago

Issue summary

When cloning a data model, you may encounter an error:

The BulkCopy parameters were invalid. - Copy to and Copy from must contain the same set of dimensions - The versioning configuration "X" is invalid. Delete it and attempt the operation again.

> **⚠ Job Error on Step 1**   📋
>
> ▼ The BulkCopy parameters were invalid. - Copy to and Copy from must contain the same set of dimensions - The versioning configuration Current Plan Backup is invalid. Delete it and attempt the operation again.

Suggested solution

1. Navigate to the **Modeler** tab.
2. Select the *Data Model* you are trying to clone.
3. Select **Versioning**.
4. In the **Versioning Configuration** section, select the configuration name referenced in the error message from the drop-down menu.

Versioning Configuration

📥 Copy To

Period 02

Copy Line Item Details ⓘ

No Line Item Details ⌄   ☐ Version Parent Members ⓘ

☐ Clear all destination intersection values before copying ⓘ

☐ Run Calcs ⓘ

🗑 Delete Configuration   💾 Save   ▶ Run

5. Fix the versioning parameters and select **Save**.
    1. If the configuration is no longer required, select **Delete Configuration**.

6. Re-clone the data model.

Cause

This may occur if the data model you are trying to clone contains a saved versioning configuration that is incorrect or has errors.

Keywords

bulkcopy parameters, clone model, versioning.
